

# lumi by Pampers™

The world's first all-in-one  
connected care system

Being a new parent is the most important job in the world. Parents will do everything they can to make sure their baby is comfortable, safe and cared for. And, they will do anything to support their baby's unique development, because after all there is no baby like your own.

Everywhere we look, technology is simplifying and connecting our lives – but what about for parents? Whether it is anticipating changes as babies grow and develop, helping to establish a routine or simply trying to better understand their baby's everyday development, there are so many things we can do to help parents!

Lumi uniquely combines an HD video baby monitor with an activity sensor and brings the information together in an easy to use app so parents have a real time holistic view of their baby's sleep, feeding and diapering patterns, all-in-one place – 24/7.

Lumi lets you see and know how your baby is doing right now, at a glance, anticipate their needs and build your rhythm as a family.

## How Lumi by Pampers™ Helps Parents

See and know, at a glance, how your baby is doing, anticipate their needs, build your rhythm as a family.

### Anticipate baby's needs

With a quick glance, you can see both the monitor feed and the sensor data. You'll know if baby is comfortable or if they might need feeding or changing soon, giving you reassurance at your fingertips.

### Unlock baby's sleep

Lumi automatically tracks your baby's sleep 24/7 and charts it over time so you can discover their patterns and create a routine. Routine helps babies fall asleep faster, sleep longer and fuels brain development.

### Personalized insights

Lumi transforms your baby's data into unique insights and tips to help you gain a deeper understanding as they develop and grow. Get personalized insights and access content from experts including The Wonder Weeks®.

The Wonder Weeks

### Securely share with other caregivers

Lumi lets parents extend access to their baby's circle of caregivers, so they can all stay in the know, and manage permissions from the app.

# Baby Monitoring, Revolutionized

Lumi by Pampers™ uniquely combines a smart HD video monitor with an activity sensor and brings the information together in an easy to use app – everything you need to know at a glance.

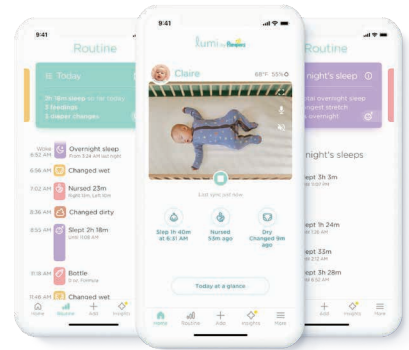

## Activity Sensor

Seamlessly tracks baby's sleep and diaper activity (wetness and number of diapers) 24/7

## Video Monitor

Unbelievable resolution even at night. HD 1080p 180° wide angle, 2-way audio and continuous background audio. Also monitors room temperature and humidity.

## Lumi App

Know how your baby is doing at a glance. See their patterns develop over time and create a routine that works for the whole family.

## Our Partners

We connected with the most credible companies to bring the vision to life: Verily, a leader in platforms, sensors and software for health data with reputable scientists and engineers, and Logitech, a leader in consumer electronics with expertise in security camera technology.
